The 29LW14AX71UN/2 series of Industrial LCD monitors has been designed as replacement for 14" & 15" CRT monitors. Ease of integration into a wide range of Measurement, Instrumentation and Human-Machine interface applications has been a key consideration. It uses KME's series of Minimum Width 15.0" TFT monitors fixed to an Open-frame chassis. Base plate fixings and holes have been designed to pick up on the original CRT chassis mounting positions. The centre point of the display can be adjusted to suit both 14" & 15" CRTs.

The 14AX series offers full protection of the TFT panel with toughened safety glass and best EMC performance.
